

Exhibit 1

Plan Map 3 Suisun Bay and Marsh

PLAN MAP NOTES

Suisun Marsh - Thousands of acres of managed wetlands are maintained primarily by private duck-hunting clubs as migratory waterfowl habitat which also provides habitat for other wildlife species such as shorebirds. Areas are diked, but dikes are opened for periodic flooding. Suisun Resource Conservation District assists duck clubs in the protection and enhancement of managed wetlands.

Suisun Marsh Protection Plan - The Protection Plan is a more specific application of the policies of the Bay Plan because of the unique characteristics of the Suisun Marsh. The policies of both the Bay Plan and the Protection Plan apply within the Marsh in the absence of a certified Suisun Marsh Local Protection Program component. In event of policy conflict between the Bay Plan and Protection Plan, the policies of the Protection Plan control. Refer to maps and policies of the Protection Plan and the Suisun Marsh Preservation Act of 1977 for more specific information.

Suisun Marsh Local Protection Program - Pursuant to the Suisun Marsh Preservation Act of 1977, the Commission has certified the Local Protection Program components of Solano County, Solano County Local Agency Formation Commission, the cities of Fairfield and Suisun City, Suisun Resource Conservation District, and Solano County Mosquito Abatement District. Marsh development permits for development in the Suisun Marsh must be consistent with the Local Protection Program component of the local agency with jurisdiction over the project. See the Preservation Act and the components of the Local Protection Program for more information.

Collinsville Area - The Collinsville-Montezuma Slough area is adjacent to the deep water shipping channel, has rail ~~service facilities nearby~~, and consists of flat land. ~~It is one of the largest available sites anywhere in the Bay Area for water-related industry.~~ The shoreline fronting on the main shipping channel is limited, however, and this relatively small frontage should be carefully planned and shared for maximum industrial development.

Recreational Potential - Extensive, valuable recreational potential in river and island areas (e.g. Sherman Island—"Sherman Lake" area popular for boating, fishing). Recreational use should be encouraged.

Concord Naval Weapons Station - Plan maps indicate recommended use for bayfront military installations if one or more of these bases is ever declared surplus by the military. The Bay Plan does not advocate the closing of any military installation.

San Francisco Bay National Estuarine Research Reserve (Rush Ranch Open Space Preserve) - One of two sites in the Bay, the other being China Camp State Park, with one additional site in the Delta, named Browns Island Regional Shoreline. These sites are part of a federal-state cooperative scientific research and education program that is part of a national system of estuarine research reserves. The Commission supports the program as a member of the Management Advisory Board.

San Francisco Bay Area Water Trail - Pursuant to state legislation, the Commission, in partnership with the State Coastal Conservancy, Association of Bay Area Governments and interested parties, is preparing a San Francisco Bay Area Water Trail plan. The Water Trail will provide a series of linked landing and launching sites around the Bay for human-powered boats and beachable sail craft, and provide for diverse, water-accessible overnight accommodations, including camping.
