Subject: NOAA Marine Debris RESEARCH Federal Funding Opportunity

Hi all,

The NOAA Marine Debris Program is pleased to announce our Fiscal Year 2019 "Marine Debris Research" federal funding opportunity. *Please note that this is separate from the FY19 "Marine Debris Removal" federal funding opportunity described in my 8/21 email copied below.*

This opportunity provides funding for research directly related to marine debris through field, laboratory, and modeling experiments. Successful project proposals will explore the ecological risk associated with marine debris, determine debris exposure levels, examine the fate and transport of marine debris in nearshore coastal environments, and/or quantify habitat impacts resulting from marine debris. Projects may address one or more of these research priorities and should be original, hypothesis-driven projects that have not previously been addressed to scientific standards.

The submission period for research proposals will extend from **September 17 - December 14, 2018**.

For more information on this FY19 grant opportunity, please visit [Grants.gov](https://www.grants.gov) and the NOAA Marine Debris Program's [website](#). The full funding announcement is attached here. Please share with your networks!

Best,
Sherry
