455 Golden Gate Avenue, Suite 10600, San Francisco, California 94102 tel 415 352 3600 fax 415 352 3606

January 12, 2018

TO: Commissioners and Alternates

FROM: Lawrence J. Goldzband, Executive Director (415/352-3653; larry.goldzband@bcdc.ca.gov)
Brad McCrea, Regulatory Program Director (415/352-3615; brad.mccrea@bcdc.ca.gov)

SUBJECT: Listing of Pending Administrative Matters
(For Commission consideration on January 18, 2018)

This report lists the administrative permit applications, federal consistency actions, marsh development permits in the Secondary Management Area of the Suisun Marsh, regionwide permit actions, minor amendments to the Suisun Marsh Local Protection Program, and emergency permits that are pending with the Commission. The staff members to whom the matters have been assigned are indicated at the end of the projects' description. Inquiries should be directed to the assigned staff member prior to the Commission meeting.

Administrative Permits and Federal Consistency Actions

The following administrative permit application has been filed and is presently pending with the Commission. The Executive Director will take the action indicated on the matter unless the Commission determines that it is necessary to hold a public hearing.

Applicant: Alameda County Flood Control and Water Conservation District
399 Elmhurst Street
Hayward, CA 94544

BCDC Permit Application No. M2017.027.00

Filed: 10/05/17
90th Day: 01/03/18
Agreed Issuance Extension Date: 01/31/18

Location: In the Bay, along a portion of Alameda County's Laguna Creek flood control channel; and upland locations along the channel within the Commission's 100-foot shoreline band jurisdiction, located in the City of Fremont, Alameda County.

Description: To increase the capacity of the Laguna Creek (Cushing Parkway flood control channel (Zone 6, Line E)) sufficiently to contain 100-year storm flows and meet FEMA standards.

In the Bay.

1. Demolish and excavate portions of structures under Cushing Parkway, including relocating outfall pipes and/or utility lines;
2. Construct an additional 12-foot-wide by 9-foot-tall by 120-foot-long box culvert under Cushing Parkway (totaling approximately 12.9 cy of new Bay fill);
3. Place concrete, riprap, and other fill to construct new headwalls, wing walls, and an apron around the new culvert to stabilize channel banks; and
4. The project will result in approximately 1,440 square feet (120 cy) of new Bay fill.

Within the 100-foot Shoreline Band.

1. Widen an approximately 1,050 linear-foot section of the flood control channel by constructing new retaining/floodwalls landward of the existing levees, excavating approximately 4,500 cy of soil from the top portion of the existing channel levees to lower the levee elevation, and removing and placing the soil on the District's property south of the channel, and/or at an approved upland location outside the Commission's jurisdiction. Additionally, the District's maintenance road would be realigned to allow the lowering of the levee crown on the channel-side of the floodwalls.

Tentative Staff Position: Recommend Approval. (Anniken Lydon; 415/352-3624 or anniken.lydon@bcdca.gov)
