PERMIT NO. M78-57

August 15, 1978

City of Foster City
Estero Municipal Improvement District
610 Foster City Boulevard
Foster City, California 94102

ATTENTION: Richard K. Hopper
Director of Public Works

RECEIVED
AUG 18 1978

SAN FRANCISCO BAY CONSERVATION
& DEVELOPMENT COMMISSION

Gentlemen:

I. Authorization

A. You are hereby authorized in the Bay at Belmont Slough, to dredge 20,000 cubic yards of material and to dispose of the spoils outside of the Commission's jurisdiction to provide a 12-foot bottom width channel from an existing lagoon intake structure to the main channel slough of Belmont Slough to improve water circulation in an existing lagoon system at Foster City, in San Mateo County.

B. This authority is generally pursuant to and limited by your application dated May 4, 1978, and its accompanying exhibits and all conditions of this permit.

C. Work authorized herein must commence prior to September 1, 1978, or this permit will lapse and become null and void. Such work must be diligently prosecuted to completion and must be completed within six (6) months of commencement or by March 1, 1979, whichever is earlier, unless an extension of time is granted by amendment of the permit.

II. Special Condition

The authorization made herein shall be subject to the following special conditions in addition to the Standard Conditions in Part IV:

A. Work must be performed in a manner assuring that the area is adequately flushed and drained for the purposes of mosquito control. All reasonable measures shall be undertaken to eliminate depressions and ground cracks that might trap tidal waters and cause ponding. Maintenance of sloughs and ditches shall be performed periodically as necessary to provide adequate water circulation and to preclude the ponding of stagnant waters.

B. The applicant shall grade the slopes of the proposed channel in such a manner to provide elevations suitable for the establishment of cordgrass (*Spartina foliosa*).

III. Findings and Declarations

On behalf of the Commission, I find and declare that:

A. The project authorized by this permit involves the dredging of 20,000 cubic yards of material to provide a 12-foot bottom width channel to improve lagoon circulation, an activity defined in Regulation Section 10122(a)(2) and the disposal of the dredge spoils outside of the Commission's jurisdiction; and thus is a "minor repair or improvement" for which the Executive Director may issue a permit pursuant to Government Code Section 66632(f) and Regulation 10530(a).

B. The project authorized herein is consistent with the McAteer-Petris Act and the San Francisco Bay Plan in that dredging is necessary to enlarge an intake channel in order to improve water circulation in an existing lagoon system.

C. The Commission further finds, declares, and certifies that the activity or activities authorized herein are consistent with the Commission's Management Program for San Francisco Bay as approved by the Department of Commerce under the Federal Coastal Zone Management Act of 1972, as amended.

D. The City of Foster City certified a Negative Declaration of Environmental Impact on May 30, 1978.

E. Pursuant to Regulation Section 10542, this project was listed with the Commission on July 6, 1978.

IV. Standard Conditions

A. All required permissions from governmental bodies must be obtained before the commencement of work; this includes, but is not limited to, the U. S. Army Corps of Engineers, the State Lands Commission, the Regional Water Quality Control Board, and the city and/or county in which the work is to be performed, whenever any of these may be required. This permit does not relieve the permittee of any obligations imposed by State or Federal law, either statutory or otherwise.

B. The attached Notice of Completion shall be returned to the Commission within thirty (30) days following completion of the work.

C. Work must be performed in the precise manner and at the precise locations indicated in your application.

D. Work must be performed in a manner so as to minimize muddying of waters, and if diking is involved, dikes shall be waterproof. If any seepage returns to the Bay, the permittee will be subject to the regulations of the Regional Water Quality Control Board in that regard.

E. Except as otherwise noted, violation of any of the terms of this permit shall be grounds for revocation. The Commission may revoke any permit for such violation after a public hearing held on reasonable notice to the permittee or to his assignee if the permit has been effectively assigned.

F. This permit shall not take effect unless the permittee executes the original of this permit and returns it to the Commission within fifteen (15) days after the date hereof.

Executed at San Francisco, California, on behalf of the San Francisco Bay Conservation and Development Commission on the date first above written.

CHARLES R. ROBERTS
