## *Notice*

June 16, 2026

### **Notice of Intent to Initiate the Tiburon Subregional Shoreline Adaptation Plan that includes the Jurisdiction of the Town of Tiburon**

**Notice** is hereby given that the jurisdiction of the **Town of Tiburon** has formally initiated the development of a subregional plan which intends to conform to the guidelines in the Regional Shoreline Adaptation Plan (RSAP), as pursuant to Sea level rise: planning and adaptation, SB 272 (2023), and with the intent to seek approval from the San Francisco Bay Conservation and Development Commission.

The following information is intended to provide information for the public to understand the nature of the subregional plan and identify information on how to engage in the development of the subregional plan. In accordance with the RSAP, upon local adoption and submittal of the subregional plan to the Commission, the Commission staff will review the plan for completeness. If the submittal is deemed complete, an additional notice will be issued to establish a date for public hearing and vote for the Commission to approve the subregional plan. At least 30 days prior to the public hearing, the Executive Director will mail a staff summary and recommendation to the Commission evaluating conformance of the subregional plan with the RSAP.

**Plan Name: Tiburon Sea Level Rise Vulnerability Assessment and Adaptation Plan**

**Jurisdiction(s) Involved: Town of Tiburon**

**Project Description:** The Town of Tiburon is preparing a Subregional Shoreline Adaptation Plan to assess vulnerabilities to sea level rise and coastal flooding and to identify feasible, locally appropriate adaptation strategies. Funded by the Ocean Protection Council, the Plan will fulfill the requirements of the San Francisco Bay Conservation and Development Commission's (BCDC) Regional Shoreline Adaptation Plan (RSAP) framework including consistency with the One Bay Vision, Strategic Regional Priorities, and RSAP Minimum Standards. The project will evaluate risks to community assets, infrastructure, environmental resources, and public access areas

using best available science, regional and local data, and community and stakeholder input. The Town will develop adaptation pathways and advance one to three priority strategies to a conceptual design level, along with implementation considerations, to inform future resilience projects, policy decisions, and funding opportunities. Consistent with the RSAP Equity Assessment Standard, the Plan will consider differential exposure and adaptive capacity among residents, shoreline users, workers, and visitors, with attention to public access, emergency response, and community well-being.
